

# GUI Installation Guide

This guide is for the installation of our website. our website is based on Apache, Mysql, Php. You'd better browser it through Google Chrome to achieve better interaction.

## Requirement Environment

in the terminal:

```
sudo apt-get install taskset  
sudo taskset
```

- select LAMP server to install.
- you **MUST** input "mysql" as MySQL root password.

Then, install the phpmysql to management Mysql easily.  
In terminal:

```
sudo apt-get install phpmysql
```

After finish this, you'll see the Helloworld webpage in <http://localhost> and <http://localhost/phpmyadmin>.

You can also reference [this website](#) to have more help.

## Website installation

Unzip our meshsr.zip to /var/www.

```
unzip meshsr.zip  
sudo mv meshsr/ /var/www
```

Then you will see the GUI in <http://localhost/meshsr>

# Mysql Import

the Database name we use **MUST** be meshsr.  
you can simply import our .sql file through this:

```
mysql meshsr < meshsr.sql
```

you can also reference this [page](#) to get help.
